Philosophical Reflections on Disability D. Christopher Ralston 2009-09-19 This project draws together the diverse strands of the debate regarding disability in a way never before combined in a single volume. After providing a representative sampling of competing philosophical approaches to the conceptualization of disability as such, the volume goes on to address such themes as the complex interplay between disability and quality of life, questions of social justice as it relates to disability, and the personal dimensions of the disability experience. By explicitly locating the discussion of various applied ethical questions within the broader theoretical context of how disability is best conceptualized, the volume seeks to bridge the gap between abstract philosophical musings about the nature of disease, illness and disability found in much of the philosophy of medicine literature, on the one hand, and the comparatively concrete but less philosophical discourse frequently encountered in much of the disability studies literature. It also critically examines various claims advanced by disability advocates, as well as those of their critics. In bringing together leading scholars in the fields of moral theory, bioethics, and disability studies, this volume makes a unique contribution to the scholarly literature, while also offering a valuable resource to instructors and students interested in a text that critically examines and assesses various approaches to some of the most vexing problems in contemporary social and political philosophy.

Ethnic Marketing Guilherme D. Pires 2018-12-17 Together with the development of transformative technologies that epitomize globalization, the ongoing movements of people across borders and other socio-economic pressures are creating a fast-changing business environment that is difficult for business to understand, let alone control. Dominant social expectations that immigrants should seek to adopt an assimilationist socialization path towards the host country's mainstream are contradicted by minority ethnic group resilience. There is no evidence that these groups naturally disappear within the cultural and behavioural contexts of their adopted countries. Since ethnic minority consumers cannot be expected to assimilate, then they maintain some significant degree of unique ethnicity related consumer characteristics that convert into threats and opportunities for business. The inherent socialisation process also provides opportunities for ethnic entrepreneurship and for proliferation of ethnic minority business. Following from the extensive examination of scholarly perspectives of ethnic marketing theory, there is an acknowledged and marked divide between theoretical exhortations and what is done in practice, a relative oversight of the implications of mixed embedded markets, and a propensity to overlook the crucial role played by ethnic entrepreneurship and ethnic networks. Opportunity valuations are difficult to enact due to a lack of intelligence about ethnic markets. Variable sentiment about the future of ethnic marketing links to different predictions on how the drivers of globalization will impact on the acculturation paths of ethnic minorities. Keeping a focus on the ethnic group as the unit of analysis, combining ethnic marketing and ethnic entrepreneurship theories provides intelligence about contemporary ethnic marketing and practice perspectives. The ultimate objective is to reduce the theory-practice divide through the development of a collaborative framework between business and scholars that converts into theory-in-use.

The Hardmen: Legends and Lessons from the Cycling Gods The Velominati 2017-11-07 Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

Biology of Humans Judith Goodenough 2013-01-09 Known for its unique "Special Topic" chapters and emphasis on everyday health concerns, the Fifth Edition of *Biology of Humans: Concepts, Applications, and Issues* continues to personalize the study of human biology with a conversational writing style, stunning art, abundant applications, and tools to help you develop critical-thinking skills. The authors give you a practical and friendly introduction for understanding how their bodies work and for preparing them to navigate today's world of rapidly expanding and shifting health information. Each chapter now opens with new "Did You Know?" questions that pique your interest with intriguing and little-known facts about the topic that follows. The Fifth Edition also features a new "Special Topic" chapter (1a) titled "Becoming a Patient: A Major Decision," which discusses how to select a doctor and/or a hospital, how to research health conditions, and more.

More Food: Road to Survival Roberto Piloni 2017-06-16 *More Food: Road to Survival* is a comprehensive analysis of agricultural improvements which can be achieved through scientific methods. This reference book gives information about strategies for increasing plant productivity, comparisons of agricultural models, the role of epigenetic events on crop production, yield enhancing physiological events (photosynthesis, germination, seedling emergence, seed properties, etc.), tools enabling efficient exploration of genetic variability, domestication of new species, the detection or induction of drought resistance and apomixes and plant breeding enhancement (through molecularly assisted breeding, genetic engineering, genome editing and next generation sequencing). The book concludes with a case study for the improvement of small grain cereals. Readers will gain an understanding of the biotechnological tools and concepts central to sustainable agriculture. *More Food: Road to Survival* is, therefore, an ideal reference for agriculture students and researchers as well as professionals involved sustainability studies.

Human Rights in the Digital Age Mathias Klang 2004-12-23 The digital age began in 1939 with the construction of the first digital computer. In the sixty-five years that have followed, the influence of digitisation on our everyday lives has grown steadily and today digital technology has a greater influence on our lives than at any time since its development. This book examines the role played by digital technology in both the exercise and suppression of human rights. The global digital environment has allowed us to reinterpret the concept of universal human rights. Discourse on human rights need no longer be limited by national or cultural boundaries and individuals have the ability to create new forms in which to exercise their rights or even to bypass national limitations to rights. The defence of such rights is meanwhile under constant assault by the newfound ability of states to both suppress and control individual rights through the application of these same digital technologies. This book gathers together an international group of experts working within this rapidly developing area of law and technology and focuses their attention on the specific interaction between human rights and digital technology. This is the first work to explore the challenges brought about by digital technology to fundamental freedoms such as privacy, freedom of expression, access, assembly and dignity. It is essential reading for anyone who fears digital technology will lead to the 'Big Brother' state.

Johanssonian Investigations Christer Svennerlind 2013-05-02 In the last decades, Ingvar Johansson has made a formidable contribution to the development of philosophy in general and perhaps especially to the development of metaphysics. This volume consists of original papers written by 50 philosophers from all over the world in honour of Ingvar Johansson to celebrate his 70th birthday. The papers cover traditional issues in metaphysics and the philosophy of mind, applied ethics and applied metaphysics, the nature of human rights, the philosophy of economics and sports. Some of the papers study the philosophy of Ingvar Johansson. All of them studies subjects which he has shown an interest in. The variety of subjects covered, testifies to the extraordinary wide range of issues his thought has had a bearing on.

Ramonst A.F Knott 2016-11-18 Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.

Ethics of Terrorism & Counter-Terrorism Georg Meggle 2013-05-02 We are supposed to wage war against Terrorism - but exactly what we are fighting against in this war, there is nearly no consensus about. And, much worse, nearly nobody cares about this conceptual disaster - the main thing being, whether or not you are taking sides with the good guys. This volume is an analytical attempt to end this disaster.

What is Terrorism? Are terrorist acts to be defined exclusively on the basis of the characteristics of the respective actions? Or should we restrict such actions to acts performed by non-state organisations? And, most important, is terrorism already by its very nature to be morally condemned? But, having a clear idea of what Terrorism is, would be only the beginning. Rational moral assessment still needs two further components: The relevant facts; and the relevant values and norms. Now, in a field where systematic disinformation has been even proclaimed to be the official policy, facts are obviously very hard to get at. This volume is mainly interested in Ethics: What's wrong with Terrorism? And what is morally right or morally wrong, respectively, with all the different means of Counter-Terrorism? What are the moral boundaries for waging war against terrorism? What are the right ways of dealing with terrorists? And what about the alleged anti-terrorism wars on Afghanistan and Iraq? With contributions from Marcelo Dascal, Tomis Kapitan, Daniel Messelken, Seamus Miller, Olaf L. Mueller, Igor Primoratz, Charles P. Webel, Per Bauthn, Rüdiger Bittner, C. A. J. (Tony) Coady, Haig Khatchadourian, Georg Meggle, Peter Simpson, Carolin Emcke, Ralf Groetker, Laurence Lustgarten, Thomas Mertens, Aleksandar Pavkovic, Filimon Peonidis, Janna Thompson, Véronique Zanetti

Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Sex Shamans KamalaDevi McClure 2020-02-04 20 transformative stories and sexual healing practices from international pioneers in the sexual shamanism movement. Reveals intimate details about how each sex shaman overcame personal struggles with heartache, jealousy, mental illness, or social shame to realize their calling as a sacred sexual healer. Includes 20 in-depth embodiment exercises such as soul gazing, contacting your spirit guides, sexual divination, energetic sex, self-pleasuring, moon blood rituals, and sacred sexual storytelling. Includes contributions from 20 diverse voices in the sexual shamanism community, all part of the mystery school ISTA: International School of Temple Arts Drawing on traditional and modern practices, a sex shaman uses the power of erotic energy as a healing medicine. They channel divine love and embrace sexuality freely, practicing polyamory, sexual healing, and even sex magic. They teach tantra, trance dance, kundalini yoga, and other techniques for healing shame, guilt, fear, and sexual trauma. Designed to guide the reader on a journey into their own sacred sexual awakening, this book shares true stories from 20 visionary pioneers in the sexual shamanism movement, all of them associated with the International School of Temple Arts (ISTA), a mystery school that works to illuminate the path of sexual shamanism and heal the split between sex and spirit, release the shame surrounding sexual awakening, and inspire more sexual liberation around the world. The teachers reveal intimate details of their life stories and sexual awakening journeys, showing how, by surrendering to the wisdom of the erotic current of the universe, transformation occurs. Each story is accompanied by an in-depth embodiment exercise with step-by-step instructions, including soul gazing, contacting your spirit guides, sexual divination, energetic sex, self-pleasuring, moon blood rituals, and sacred sexual storytelling. Underlying these exercises is the belief that the body is a temple that opens with pleasurable worship so spirit may dwell more fully within. The 20 contributors include Baba Dez Nichols, Bruce Lyon, Crystal Dawn Morris, Dawn Cherie, Deborah Taj Anapol, Ellie Wilde, Janine Ma-Ree, KamalaDevi McClure, Komala Lyra, Laurie Handlers, Lin Holmquist, Matooka Moonbear, Mia Mor, Ohad Pele Ezrahi, Patrik Olterman, Raffaello Manacorda, Ria Bloom, Sean O'Faolain, Stephanie Phillips, and Stephen SouLove.

The Divine Order and the Universe Bedri Ruhselman 2014-03 The Book that has been awaited for 54 years is now finally published. The spiritual communiques, issued from the Plan of Sublime Duty and named 'Order [Pioneer]' in 1959, were compiled by Bedri Ruhselman. Since then they have been preserved in the safes of notaries and banks. Now that their time has arrived after 54 years, they have now been published. The book in your hands is the faithfully translated version of the original Turkish text. In The Divine Order and The Universe you will find: * The unending rain of knowledge starting from spirit and matter... * The true comprehension of love; the advance from love towards the essence... * Discovering existential freedom and planetary awakening... * The implications of global warming, floods and earthquakes... * The lessons we learn from natural events... * Spiritual preparation through predicted facts about inevitable natural events...

Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

HAPPY FOOD Niklas Ekstedt 2018-08-23 Writing this book has changed our lives. And it could soon change yours too. Although both Niklas and I have devoted a great deal of our adult lives to food and how it affects us, the work we've done on HAPPY FOOD has forced us to re-evaluate everything that we have learned. Henrik Ennart The conversation around gut health and the food we eat has been ongoing for a while, but in this book Niklas Ekstedt and Henrik Ennart go one step further to look at how the food we eat affects our brains and mental health, too. You won't find a more interesting and hands-on book about this subject that delves deep enough into the science without being dry. The unbeatable combination of Ekstedt's recipes and kitchen know-how with Ennart's research and flowing narrative, along with beautiful pictures and impeccable Nordic cooking, makes this book a must-have. HAPPY FOOD takes Hygge into your kitchen allowing everyone the chance to live and eat like the Scandinavians. With its practical and inspiring advice, HAPPY FOOD will be your companion in everyday life, both in and out of the kitchen. Ennart and Ekstedt elegantly navigate between the Early Bird health-shot and the anti-inflammatory burger all the way to super-beetroot juice. It's all about good food, and how the right meal can change your life.

Nostalgia and Hope Ov Cristian Norocel 2020-10-09 This open access book shows how the politics of migration affect community building in the 21st century, drawing on both retrogressive and progressive forms of mobilization. It elaborates theoretically and shows empirically how the two master frames of nostalgia and hope are used in local, national and transnational settings, in and outside conventional forms of doing politics. It expands on polarized societal processes and external events relevant for the transformation of European welfare systems and the reproduction of national identities today. It evidences the importance of gender in the narrative use of the master frames of nostalgia and hope, either as an ideological tool for right-wing populist and extreme right retrogressive mobilization or as an essential element of progressive intersectional politics of hope. It uses both comparative and single case studies to address different perspectives, and by means of various methodological approaches, the manner in which the master frames of nostalgia and hope are articulated in the politics of culture, welfare, and migration. The book is organized around three thematic sections whereby the first section deals with right-wing populist party politics across Europe, the second section deals with an articulation of politics beyond party politics by means of retrogressive mobilization, and the third and last section deals with emancipatory initiatives beyond party politics as well. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. Disobedience in the Military Jean-François Caron 2018-07-23 We often think of the army as an institution whose members are required to blindly obey all orders they receive. However, this perception is inaccurate. Disobedience is a fundamental professional obligation of members of the military and overrides the obligation to follow commands. But what is the extent of this obligation? Are soldiers obligated to participate in what they consider to be an illegal war, or should they be allowed to enjoy a right to selective conscientious objection? Should soldiers obey a legal order that, if followed, would facilitate the perpetration of war crimes by a third party? How should soldiers act if they are ordered to follow a lawful order that could result in immoral consequences? Should soldiers be allowed to refuse to obey what can be labeled as suicidal orders? Based upon the nature of soldiers' professional obligations, this book tries to offer answers to these important questions. The author turns to a number of different case-studies, including conscientious objections, duty to protect in genocidal situations such as Rwanda and Srebrenica, suicidal orders in wars, as well as retribution and leniency towards war criminals, as a way of assessing the different legal and ethical implications of disobedience in the military.

Challenging Academia Heather Piper 2021-09-01 Some social issues and practices have become dangerous areas for academics to research and write about. Academic freedom is increasingly constrained, not just by long established normal factors (territoriality, power differentials, competition, protectionism), but also by the increased significance of social media and the rise of identity politics (and activists who treat work which challenges their world view as abusive hate-speech). So extreme are these pressures that some institutions and even statutory bodies now adopt policies and practices which contravene relevant regulations and laws. This book seeks to draw attention to the limiting and damaging effects of academic gagging. The book, drawn from a special edition of Societies, offers an eclectic series of international articles which may annoy some people. The book challenges taken for granted mainstream assumptions and practices in a number of areas, including gender mainstreaming, social work education, child sexual abuse, the ethnic disaggregation of population groups, fatherhood and masculinity, the erosion of democratic legitimacy, the trap of victimhood and vulnerability, employment practices in universities, and the challenges presented by the widespread and deliberate suppression of scholarship and research. In an analytic postscript Laurent Dubreuil discusses the nature of identity politics and the manner in which its effects can be identified across the many topics covered in these challenging articles.

Social Practices, Intervention and Sustainability Yolande Strengers 2014-11-13 In an era of dramatic environmental change, social change is desperately needed to curb burgeoning consumption. Many calls to action have focused on individual behaviour or technological innovation, with relative silence from the social sciences on other modes and methods of intervening in social life. This book shows how we can go beyond behaviour change in the pursuit of sustainability. Inspired by the practice turn in consumption studies, this interdisciplinary book looks through the lens of social practice theory to explore important and timely questions about how to intervene in social life. It discusses a range of applied sustainability topics including energy consumption, housing provision, water demand, transport, climate change, curbside recycling and smart grids, seeking to redefine what intervention is, how it happens, and who or what can intervene to address the growing list of environmental calamities facing contemporary societies. These issues are explored through a range of specific case studies from Australia, the UK and the US, providing theoretical insights that are of international relevance. The book will be of interest to researchers and students in the fields of sociology, consumption studies, environmental studies, geography, and science and technology studies, as well as policy makers and practitioners seeking to intervene in social life for sustainability.
