EU Policies in the Eastern Neighbourhood Elena Korosteleva 2018-10-24 The EU continuously searches for more effective policy towards its eastern neighbourhood, which is reflected in the on-going adaptation of its existing approaches, discourses and policy strategies to the new challenges of its external environment. In order to understand the complexity and limitations of the EU framework under the European Neighbourhood Policy (ENP) and the Eastern Partnership Initiative (EaP) - that is, to consider the interface between policy instruments, institutional structures, and multiple agents - one needs to adopt an original analytical perspective of practices to comprehensively assess the policies' outcomes. This volume therefore offers an examination of social practices as implemented through the use of policy instruments and subsequently embedded into the existing/emergent social structures which shape and determine the EU-neighbours' relations. To gauge success of the ENP in the eastern region, the manuscript pulls together a rich collection of geographical and thematic case-studies, joined by the overarching conceptual framework of practices. This study's principal aims are to discern patterns of social practices which guide agents' interactions in different policy areas; to explore the origin and effect of these practices (the role of dominant discourses, logistical imbalances, deliberate strategies, etc.); and to explicate the nature of the emerging social structures being established in the eastern region. This approach is distinctive from other constructivist undertakings as it allows to synergise the meanings of social actions (through the focus on agents and instruments), and their structural extensions (through the focus on emergent structures) across geo- and bio-political localities of the EU and its eastern neighbourhood. This book was published a sa special issue of East European Politics.

Production Chemicals for the Oil and Gas Industry, Second Edition Malcolm A. Kelland 2014-03-13 Production chemistry issues result from changes in well stream fluids, both liquid and gaseous, during processing. Since crude oil production is characterized by variable production rates and unpredictable changes to the nature of the produced fluids, it is essential for production chemists to have a range of chemical additives available for rectifying issues that would not otherwise be fully resolved. Modern production methods, the need to upgrade crude oils of variable quality, and environmental constraints demand chemical solutions. Thus, oilfield production chemicals are necessary to overcome or minimize the effects of the production chemistry problems. Production Chemicals for the Oil and Gas Industry,

Second Edition discusses a wide variety of production chemicals used by the oil and gas industry for down-hole and topside applications both onshore and offshore. Incorporating the large amount of research and applications since the first edition, this new edition reviews all past and present classes of production chemicals, providing numerous difficult-to-obtain references, especially SPE papers and patents. Unlike other texts that focus on how products perform in the field, this book focuses on the specific structures of chemicals that are known to deliver the required or desired performance—information that is very useful for research and development. Each updated chapter begins by introducing a problem, such as scale or corrosion, for which there is a production chemical. The author then briefly discusses all chemical and nonchemical methods to treat the problem and provides in-depth descriptions of the structural classes of relevant production chemicals. He also mentions, when available, the environmental properties of chemicals and whether the chemical or technique has been successfully used in the field. This edition includes two new chapters and nearly 50 percent more references.

Libya, the Responsibility to Protect and the Future of Humanitarian Intervention A. Hehir 2013-05-29 This book critically analyses the 2011 intervention in Libya arguing that the manner in which the intervention was sanctioned, prosecuted and justified has a number of troubling implications for the both the future of humanitarian intervention and international peace and security.

The Cambridge Companion to Quakerism Stephen W. Angell 2018-03-31 The Cambridge Companion to Quakerism offers a fresh, up-to-date, and accessible introduction to Quakerism. Quakerism is founded on radical ideas and its history of constancy and change offers fascinating insights into the nature of non-conformity. In a series of eighteen essays written by an international team of scholars, and commissioned especially for this volume, the Companion covers the history of Quakerism from its origins to the present day. Employing a range of methodologies, it features sections on the history of Quaker faith and practice, expressions of Quaker faith, regional studies, and emerging spiritualities. It also examines all branches of Quakerism, including evangelical, liberal, and conservative, as well as non-theist Quakerism and convergent Quaker thought. This Companion will serve as an essential resource for all interested in Quaker thought and practice.

The Routledge Handbook of Developments in Digital Journalism Studies Scott Eldridge II 2018-09-05 The Routledge Handbook of Developments in Digital Journalism Studies offers a unique and authoritative collection of essays that report on and address the significant issues and focal debates shaping the innovative field of digital journalism studies. In the short time this field has grown, aspects of journalism have moved from the digital niche to the digital mainstay, and digital innovations have been 'normalized' into everyday journalistic practice. These cycles of disruption and normalization support this book's central claim that we are witnessing the emergence of digital journalism studies as a discrete academic field. Essays bring together the research and reflections of internationally distinguished academics, journalists, teachers, and researchers to help make sense of a reconceptualized journalism and its effects on journalism's products, processes, resources, and the relationship between journalists and their audiences. The handbook also discusses the complexities and challenges in studying digital journalism and shines light on previously unexplored areas of inquiry such as aspects of digital resistance, protest, and minority voices. The Routledge Handbook of Developments in Digital Journalism Studies is a carefully curated overview of the range of diverse but interrelated original research that is helping to define this

emerging discipline. It will be of particular interest to undergraduate and postgraduate students studying digital, online, computational, and multimedia journalism.

Turkey, Russia and Iran in the Middle East Bayram Balci 2021-09-14 This book explores the complexity of the Syrian question and its effects on the foreign policies of Russia, Iran, and Turkey. The Syrian crisis has had a major effect on the regional order in the Middle East. Syria has become a territory where the rivalry between Russia and Western powers is being played out, and with the West's gradual withdrawal, the conflict will without a doubt have lasting effects locally and on the international order. This collection focuses on the effects of the Syrian crisis on the new governance of the Middle East region by three political regimes: Russia, Iran, and Turkey. Many articles and a number of books have been written on this conflict, which has lasted over ten years, but no publication has examined simultaneously and comparatively how these three states are participating in the shared management of the Syrian conflict.

The Neighbours of the European Union's Neighbours Sieglinde Gstöhl 2016-02-24 Should the European Neighbourhood Policy stop at the borders of the European Union's immediate neighbouring countries? This book is the first full length study of the 'neighbours of the EU's neighbours', a concept originally introduced by the European Commission with reference to Saharan Africa, the Middle East and Central Asia. These regions in the EU's broader neighbourhood are often perceived as an 'arc of crisis' from which manifold challenges emanate for Europe. This timely book takes stock of the state of the EU's cooperation with the neighbours of its neighbours and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy. How can the EU create bridges between these regions? What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation? One of the conclusions is the suggestion to consider a pragmatic 'EU Strategy for the Neighbours of its Neighbours' which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the 'arc of crisis' into another 'ring of friends'.

Conservation and Development in Cambodia Sarah Milne 2015-02-11 Written by leading authorities from Australasia, Europe and North America, this book examines the dynamic conflicts and synergies between nature conservation and human development in contemporary Cambodia. After suffering conflict and stagnation in the late twentieth century, Cambodia has experienced an economic transformation in the last decade, with growth averaging almost ten per cent per year, partly through investment from China. However this rush for development has been coupled with tremendous social and environmental change which, although positive in some aspects, has led to rising inequality and profound shifts in the condition, ownership and management of natural resources. High deforestation rates, declining fish stocks, biodiversity loss, and alienation of indigenous and rural people from their land and traditional livelihoods are now matters of increasing local and international concern. The book explores the social and political dimensions of these environmental changes in Cambodia, and of efforts to intervene in and 'improve' current trajectories for conservation and development. It provides a compelling analysis of the connections between nature, state and society, pointing to the key role of grassroots and non-state actors in shaping Cambodia's frontiers of change. These insights will be of great interest to scholars of Southeast Asia and environment-development issues in general.

Dun & Bradstreet Monthly Review 1920

The G20 and the Future of International Economic Governance Mike Callaghan 2015-10-01 The G20 needs to be bold and pragmatic if it is to deal effectively with the global economy's big issues. Since its establishment in 1999, the G20 has become a key international forum. But it suffers from inherent design flaws and remains a

work in progress. When Australia began its presidency of the 2014 summit in Brisbane, many commentators suggested that Australia's chairing of the G20 would reinvigorate it. This timely book looks at what was achieved at the Brisbane Summit and what has happened in its wake. Crucially, it explores what role the G20 could and should play in dealing with such pressing global issues as international taxation, trade, energy and climate change. Expert contributors, many of them former inside players, assess the impact of the summit in the context of the year's broader geopolitical challenges, including Russia's temporary expulsion from the G8 and the failure of the US to ratify its governance reforms to the IMF. Taking stock, contributors question the effectiveness of the G20, and identify the reforms that are needed if it is to offer strong leadership in an integrated global economy. Together they ask, what is the future of the G20 and other 'Gs'?

Rumor and Communication in Asia in the Internet Age Greg Dalziel 2013-07-18 New communication technology has transformed the way in which news about key events is communicated. For example, in the immediate aftermath of catastrophic events such as the Mumbai attacks or the Japanese tsunami, partial accounts, accurate and inaccurate facts, rumour and speculation are now very rapidly disseminated across the globe, often ahead of official announcements and formal news reporting. Often in such situations rumours take hold, and continue to characterise events even after a more complete, more accurate picture eventually emerges. This book explores how such rumours are created, disseminated and absorbed in the age of the internet and mobile communications. It includes a wide range of examples and, besides considering the overall processes involved, engages with scholarly debates in the field of media and communication studies.

State of the World's Cities 2008/9 Un-Habitat, 2012-05-04 Cities are perhaps one of humanity's most complex creations, never finished, never definitive. They are like a journey that never ends. Their evolution is determined by their ascent into greatness or their descent into decline. They are the past, the present and the future. Cities contain both order and chaos. In them reside beauty and ugliness, virtue and vice. They can bring out the best or the worst in humankind. They are the physical manifestation of history and culture and incubators of innovation, industry, technology, entrepreneurship and creativity. Cities are the materialization of humanity's noblest ideas, ambitions and aspirations but when not planned or governed properly, can be the repository of society's ills. Cities drive national economies by creating wealth, enhancing social development and providing employment but they can also be the breeding grounds for poverty, exclusion and environmental degradation. The 21st Century is the Century of the City. Half of humanity now lives in cities, and within the next two decades, 60 per cent of the world's people will reside in urban areas. How can city planners and policymakers harmonize the various interests, diversity and inherent contradictions within cities? What ingredients are needed to create harmony between the physical, social, environmental and cultural aspects of a city and the human beings that inhabit it? This report adopts the concept of Harmonious Cities as a theoretical framework in order to understand today's urban world, and also as an operational tool to confront

the most important challenges facing urban areas and their development processes. It recognizes that tolerance, diversity, social justice and good governance, all of which are inter-related, are as important to sustainable urban development as physical planning. It addresses national concerns by searching for solutions at the city level. For that purpose, it focuses on three key areas: spatial or regional harmony, which examines the main drivers of urban growth in the developing world and explores the spatial nuances of economic and social policies; social harmony, which presents and analyzes new data on urban inequalities worldwide and describes the types of shelter deprivations experienced by slum dwellers in developing world regions; and environmental harmony, which examines the role of cities in the climate change debate, and the impact of global warming on the most vulnerable cities. The report also assesses the various intangible assets within cities that contribute to harmony, such as cultural heritage, sense of place and memory and the complex set of social and symbolic relationships that give cities meaning. It argues that these intangible assets represent the soul of the city and are as important for harmonious urban development as tangible assets. Harmony within cities, argues the report, is both a journey and a destination. Published with UN-HABITAT

Scientific American 1859

New Media and Revolution Billie Jeanne Brownlee 2020-07-16 The Arab Spring did not arise out of nowhere. It was the physical manifestation of more than a decade of new media diffusion, use, and experimentation that empowered ordinary people during their everyday lives. In this book, Billie Jeanne Brownlee offers a refreshing insight into the way new media can facilitate a culture of resistance and dissent in authoritarian states. Investigating the root causes of the Syrian uprising of 2011, *New Media and Revolution* shows how acts of online resistance prepared the ground for better-organised street mobilisation. The book interprets the uprising not as the start of Syria's social mobilisation but as a shift from online to offline contestation, and from localised and hidden practices of digital dissent to tangible mass street protests. Brownlee goes beyond the common dichotomy that frames new media as either a *deus ex machina* or a means of expression to demonstrate that, in Syria, media was a nontraditional institution that enabled resistance to digitally manifest and gestate below, within, and parallel to formal institutions of power. To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising, Brownlee explains that social media and technology created camouflaged geographies and spaces where individuals could protest without being detected. Challenging the myth of authoritarian stability, *New Media and Revolution* uncovers the dynamics of grassroots resistance blossoming under the radar of ordinary politics.

English Language and Literature for the IB Diploma: Prepare for Success Angela Stancar Johnson 2021-02-22 Stretch your students to achieve their best grade with this year-round course companion; providing clear and concise explanations of all syllabus requirements and topics, and exam practice questions to support and strengthen learning. - Practice and revise skills - exam practice boxes throughout with questions for paper 1 and paper 2 with genuine example answers. - Achieve the best grades - expert advice on how to approach and explore a topic for the IA and HL essay plus Learner Portfolio activities and tips on how to present work. - Build confidence and strengthen skills - guidance on how to encompass the areas of exploration, concept connections and global issues from the new course structure into answers. Focus revision - key terms and definitions listed for each topic/subtopic.

The Boko Haram Reader Abdulbasit Kassim 2018-07-01 Since it erupted onto the world stage in 2009, people have asked, what is Boko Haram, and what does it stand for? Is there a coherent vision or set of beliefs behind it? Despite the growing literature about the group, few if any attempts have been made to answer these questions, even

though Boko Haram is but the latest in a long line of millenarian Muslim reform groups to emerge in Northern Nigeria over the last two centuries. The Boko Haram Reader offers an unprecedented collection of essential texts, documents, videos, audio, and nashids (martial hymns), translated into English from Hausa, Arabic and Kanuri, tracing the group's origins, history, and evolution. Its editors, two Nigerian scholars, reveal how Boko Haram's leaders manipulate Islamic theology for the legitimisation, radicalization, indoctrination and dissemination of their ideas across West Africa. Mandatory reading for anyone wishing to grasp the underpinnings of Boko Haram's insurgency, particularly how the group strives to delegitimize its rivals and establish its beliefs as a dominant strand of Islamic thought in West Africa's religious marketplace.

Human Development Report 2015 United Nations Development Programme (UNDP) 2016-01-22 This report takes a broad view of the link between work and human development. Work is a critical tool for economic growth and security, poverty reduction and gender equality. It enables full participation in society while affording people a sense of dignity and worth. Humans working together not only increase their material well-being, they also accumulate a wide body of knowledge that serves as the basis for cultures and civilizations. The report finds that work enhances human development when policies are taken to expand productive, remunerative and satisfying work opportunities. Workers' skills and potentials are enhanced, their well-being in terms of rights, safety and benefits are ensured with targeted interventions, and an agenda incorporating decent work, a new Social Contract and a Global Deal is pursued.

Target SBI Bank PO 20 Practice Sets Preliminary & Main Workbook with 5 Online Tests (English 6th edition) Disha Experts 2017-08-01 • Target SBI Bank PO Exam 20 Practice Sets Workbook (English Edition) is the 6th edition written exclusively for the New pattern Exam being conducted by SBI for recruitment in PO in the SBI. • The book provides 20 Practice Sets - 5 Preliminary Exam Tests + 15 Main Exam Mains Tests (10 in the book and 5 as Online Tests) & 10 Descriptive Tests - designed exactly on the pattern of the latest SBI Bank PO Exam. • The Preliminary Test contains all the 3 sections - Reasoning Ability, Quantitative Aptitude and English Language - as per the latest pattern. • The Main Mains Test contains all the 4 variety of tests - Reasoning and Computer Knowledge, Data Analysis & Interpretation, General/ Banking/ Economy Awareness and English Language - as per the latest pattern. • The Subjective Tests contains Essay Writing, Letter Writing and Paragraph Writing as per the latest pattern suggested by SBI. • The solution to each type of Test is provided at the end of the book. • The General Awareness section in the Main Test of each Practice Set contains questions from General Awareness, Current Affairs, Banking and Economic Awareness . • The book also provides detailed solutions to the June 2014, April 2013, July 2011, August 2011, June 2015 Prelim, July 2015 Main question, 2016 Prelim & Main papers of the SBI PO Exam. • This book will really help the students in developing the required Speed and Strike Rate, which will increase their final score in the exam. FEATURES OF THE ONLINE TESTS 1. The student gets to know his result immediately after the test is submitted. 2. Section-wise, Test-wise Reports are generated for the candidate. 3. Performance report across the 5 test also gets generated as the student appears in the 5 tests.

Leisure, Voluntary Action and Social Change in Britain, 1880-1939 Robert Snape 2018-04-05 In the final decades of the nineteenth century modernizing interpretations of leisure became of interest to social policy makers and cultural critics, producing a discourse of leisure and voluntarism that flourished until the Second World War. The free time of British citizens was increasingly seen as a sphere of social citizenship and community-building. Through major social thinkers, including William Morris, Thomas Hill Green, Bernard Bosanquet and John Hobson, leisure and voluntarism were theorized in terms of the good society. In post-First World War social reconstruction these writers remained influential as leisure became

a field of social service, directed towards a new society and working through voluntary association in civic societies, settlements, new estate community-centres, village halls and church-based communities. This volume documents the parallel cultural shift from charitable philanthropy to social service and from rational recreation to leisure, teasing out intellectual influences which included social idealism, liberalism and socialism. Leisure, Robert Snape claims, has been a central and under-recognized organizing force in British communities. Leisure, Voluntary Action and Social Change in Britain, 1880-1939 marks a much needed addition to the historiography of leisure and an antidote to the widely misunderstood implications of leisure to social policy today.

Routledge Handbook on Arab Media Nouredine Miladi 2020-11-29 This handbook provides the first comprehensive reference book in English about the development of mass and social media in all Arab countries. Capturing the historical as well as current developments in the media scene, this collection maps the role of media in social and political movements. Contributors include specialists in the field from North America, Europe, and the Middle East. Each chapter provides an overview of the history, regulatory frameworks and laws governing the press, and socio-political functions of the media. While the geopolitical complexities of the region have been reflected in the expert analyses collectively, the focus is always the local context of each member state. All 38 chapters consider the specific historical, political, and media trajectories in each country, to provide a contextual background and foundation for further study about single states or comparative analysis in two or more Arab states. Capturing significant technological developments and the widespread use of social media, this all-inclusive volume on Arab media is a key resource for students and scholars interested in journalism, media, and Middle East studies.

Writing Islam from a South Asian Muslim Perspective Madeline Clements 2016-04-29 This book explores whether the post-9/11 novels of Rushdie, Hamid, Aslam and Shamsie can be read as part of an attempt to revise modern 'knowledge' of the Islamic world, using globally-distributed English-language literature to reframe Muslims' potential to connect with others. Focussing on novels including Shalimar the Clown, The Reluctant Fundamentalist, The Wasted Vigil, and Burnt Shadows, the author combines aesthetic, historical, political and spiritual considerations with analyses of the popular discourses and critical discussions surrounding the novels; and scrutinises how the writers have been appropriated as authentic spokespeople by dominant political and cultural forces. Finally, she explores how, as writers of Indian and Pakistani origin, Rushdie, Hamid, Aslam and Shamsie negotiate their identities, and the tensions of being seen to act as Muslim representatives, in relation to the complex international and geopolitical context in which they write.

Bread, Freedom, Social Justice Anne Alexander 2014-10-09 Accounts of the Arab Spring often focus on the role of youth coalitions, the use of social media, and the tactics of the Tahrir Square occupation. This authoritative and original book argues that collective action by organised workers played a fundamental role in the Egyptian revolution, which erupted after years of strikes and social protests. Drawing on the authors' decade-long experience of reporting on and researching the Egyptian labour movement, the book provides the first in-depth account of the emergence of independent trade unions and workers' militancy during Mubarak's last years in power, and their destabilising impact on the post-revolutionary regimes.

Inside Terrorism Bruce Hoffman 2017-09-05 Bruce Hoffman's Inside Terrorism has remained the seminal work for understanding the historical evolution of terrorism and the terrorist mind-set. In this revised third edition of his classic text, Hoffman analyzes the latest developments in global terrorism, offering insight into new adversaries, motivations, strategies, and tactics. He focuses on the rise of ISIS and the resilience of al-Qaeda; terrorist exploitation of the Internet and embrace of social media; radicalization of foreign fighters; and potential future trends, including the repercussions of a post-caliphate ISIS. Hoffman examines the demographics of contemporary terrorist leaders and recruits; the continued use of suicide bombers; and the likelihood of a chemical, biological, radiological, or nuclear terrorist strike. He also considers the resurgence of violent antigovernment militants, including white supremacists and opponents of abortion. He argues that the war on terrorism did not end with Osama bin Laden's death and that ongoing instability and strife in Syria, Iraq, Afghanistan, Libya, and Yemen, among other places, will both sustain terrorist movements and have broad implications for domestic and international security around the globe.

Publishing Higher Degree Research Janice Orrell 2016-08-23 This book is proof of what is possible when higher degree candidates and their supervisors collaborate to ensure publication of higher degree research; one of the responsibilities that comes with higher degree candidature and supervision. It transcends the limitations inherent in traditional 'isolationist', 'master and apprentice' relationships to reveal the transformative value of building productive networks among academics and students. Written for higher degree research policy makers, administrators, supervisors and candidates in the field of education, this book aims to provoke departmental mindfulness of the higher degree research journey and, in light of this, reconsideration of the nature of supervisory roles and practices. It explores key research on higher degree research candidature and supervisory practices; reveals the reflections of 14 higher degree candidates' experiences in terms of the impact and transformations that occur as a result of undertaking research, not least of which is writing for publication; showcases aspects of their research in their published chapters; and accords them first author status. Its five sections are: Publishing Higher Degree Research: key research on higher degree research candidature and supervisory practices, and the process of transforming students from candidates into published researchers. Learning with Technology: in Aboriginal education and in primary and early childhood education. Professional Learning and Practice: in the development of teacher research and inquiry, enhancing and assuring learning quality in Indonesia and Lesotho, and higher order thinking in teaching trade skills. Student Learning: in teaching English language in Indonesia, and the place of intimation in creativity and innovation in mathematics teaching. Curriculum Change: in teaching University mathematics in English in Indonesia, integrating graduate attributes in an Islamic University in Aceh, enabling innovation in Acehnese schools and reforming assessment in Rwanda.
