Smart Packaging Technologies for Fast Moving Consumer Goods Joseph Kerry 2008-05-23 Smart Packaging Technologies for Fast Moving Consumer Goods approaches the subject of smart packaging from an innovative, thematic perspective: Part 1 looks at smart packaging technologies for food quality and safety Part 2 addresses smart packaging issues for the supply chain Part 3 focuses on smart packaging for brand protection and enhancement Part 4 centres on smart packaging for user convenience. Each chapter starts with a definition of the technology, and proceeds with an analysis of its workings and components before concluding with snapshots of potential applications of the technology. The Editors, brought together from academia and industry, provide readers with a cohesive account of the smart packaging phenomenon. Chapter authors are a mixture of industry professionals and academic researchers from the UK, USA, EU and Australasia.

Songs of Profit, Songs of Loss: Private Equity, Wealth, and Inequality Daniel Scott Souleles 2019-06 Since the early 1980s, private equity investors have heralded and shepherded massive changes in American capitalism. From outsourcing to excessive debt taking, private equity investment helped normalize once-taboo business strategies while growing into an over \$3 trillion industry in control of thousands of companies and millions of workers. Daniel Scott Souleles opens a window into the rarefied world of private equity investing through ethnographic fieldwork on private equity financiers. Songs of Profit, Songs of Loss documents how and why investors buy, manage, and sell the companies that they do; presents the ins and outs of private equity deals, management, and valuation; and explains the historical context that gave rise to private equity and other forms of investor-led capitalism. In addition to providing invaluable ethnographic insight, Songs of Profit, Songs of Loss is also an anthropological study of inequality as Souleles connects the core components of financial capitalism to economic disparities. Souleles uses local ideas of "value" and "time" to frame the ways private equity investors comprehend their work and to show how they justify the prosperity and poverty they create. Throughout, Souleles argues that understanding private equity investors as contrasted with others in society writ large is essential to fully understanding private equity within the larger context of capitalism in the United States.

Flowcasting the Retail Supply Chain André J. Martin 2006 Despite the myriad supply chain management approaches that have been spawned over the last decade or more, retailers have been unable to put a dent in out-of-stocks at store level, Why is that? Andre' Martin, Mike Doherty, and Jeff Harrop- all experienced practitioners, consultants, and implementation specialists in the field of time-phased supply chain planning - have been asking themselves the same question and have come to the conclusion that 1) far less forecasting is needed in the retail supply chain and 2) the only forecasting that needs to happen is at the store shelf. Flowcasting the Retail Supply Chain outlines a breakthrough approach for supply chain planning that mimics the natural flow of products from the factory to the consumer. It is the first and only approach that truly puts the consumer front and center when planning the supply chain.
