**Asset Recovery Handbook** Jean-Pierre Brun 2021-02-08 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. Criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases of creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving extensive and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternative processes. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this *Asset Recovery Handbook: A Guide for Practitioners* to assist those grappling with the strategic, organizational, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces best practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group, the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.
